PROFILE SUMMARY

A knowledgeable ICT professional with a Bachelor's degree in Computer Science and strong background in network design, cybersecurity, and software development. I demonstrate expertise in IT support, web development, and data analysis, from my experience in troubleshooting, system administration, and online marketing. I have strong problem-solving skills and ability to work effectively both independently and, in a team set up. I am committed to continuously learn and grow professionally, with certification and practical experience. I am very reliable, detail-oriented, and dedicated to fostering efficient and secure the sensitive digital environment.

WORK EXPERIENCE

Go Maxis Limited (February ,2024 – May, 2026)

Position | ICT MANAGER

Responsibilities:

- Software Development: Collaborating with backend and design teams to implement secure form handling and input validation, reducing client-side errors.
- Bug Tracking: Resolve an average of 5–8 UI bugs per week, improving application stability and user experience.
- Operations: Managing daily ICT operations, including system installations, maintenance, upgrades, and troubleshooting hardware and software issues, enhancing overall operational efficiency.
- User Support: Providing technical support and training to staff
- Data Management: Managing and organizing data, including inputting, updating, and ensuring data accuracy in databases.
- Strategy & Planning: Developing and implementing ICT policies, strategies, and plans that support organizational objectives.
- Infrastructure Management: Overseeing servers, networks (LAN/WAN), security systems (firewalls, antivirus), and communication tools (VOIP, video conferencing).
- Security: Ensuring data security through audits, implementing security measures, and managing disaster recovery/business continuity plans.
- Vendor Management: Managing relationships with suppliers and negotiating contracts.
- Budgeting: Developing and managing the ICT budget.
- Documentation: Create user manuals and documentation for various software applications, improving user experience and understanding.

- Research and Development: Conduct research on emerging technologies to support the ICT team in evaluating new tools and systems for implementation.

Badili Africa Limited (June, 2023 – February, 2024)

Position | SOFTWARE QUALITY ASSURANCE TESTER

Responsibilities:

- Testing: Running manual and automated tests (black box, white box, regression, performance, etc.) to find defects.
- Bug Tracking: Documenting issues in bug tracking systems (like JIRA), reporting them to developers, and monitoring their resolution.
- Test Case Development: Designing and optimizing test plans, scenarios, and scripts.
- Collaboration: Working with developers and product teams to provide feedback and improve functionality.
- Quality Standards: Ensuring software meets company standards and release readiness criteria.
- Documentation: Create user manuals and documentation for various software applications, improving user experience and understanding.
- Developed responsive user interfaces using HTML5, CSS3, JavaScript, improving user engagement by approximately 25%.
- Quickly picked up new tools and applied them to improve workflows, such as the use of Bootstrap.
- Handling System Admin and support to the other departments.
- Rolling back faulty software to earlier, more stable versions to resolve issues.
- Pulling out data from database that is needed by various departments for report generation.
- Participating in IT Meetings for further education.

Agricultural Mobile Application Development Workshop (SSD

Africa) (January, 2022 – April, 2022)

Position | ICT INTERN

Responsibilities:

- During the Agricultural Mobile Application Development Workshops 2022, students from different departments of PU formed a select, multidisciplinary class of more than 20 students and worked together for one semester to develop Android compatible Applications that addressed an issue faced by the local agricultural community in Kilifi-Kenya.
- The intensive programme included bi-weekly theoretical and practical sessions on each of the following subjects: Market research, Business Planning, Effective Teamworking, Advertising Strategies, Business Presentation and working with Kotlin language in XML and Android Studio.
- A Project to empower the farmers with real time platform where they can engage with buyers and sell farm products hence avoiding limitations such as time wastage, limited market area/buyers.
- Through teamwork we conducted Market research, Business Planning, Advertising Strategies, Business

Presentation.

- Worked with Kotlin language in XML and Android Studio tool to develop a user-friendly android application to help farmers market their farm products, have instant transactions and delivery, and access to wide range of market/buyers.
- Gained knowledge from other fields of study; Agriculture and Business and applying the knowledge to solve-problems.
- Ability to lead, motivate and work in a team set up.
- Keeping log records on the movement of ICT equipment's in the office and during field research.
- Submitted a business portfolio and prevention talks on the developed application.

Dunia Moja Community Network & Lamuka Hub (June, 2021- December, 2021)

Position | TECHNICAL TRAINER

Responsibilities:

- An organization aiming to empower underprivileged children and society to have access to digital literacy.
- I served as a Technical Mentor and Trainer, by help of Cisco Networking Academy resources I designed and delivered beginner- friendly programming lessons, get connected lessons and best practice when using the Internet, and provided mentorship to foster problem-solving and digital literacy skills among learners. Working with Tech groups formed, I helped make tech education accessible and engaging, inspiring the next generation of young innovators from undeserved Communities.
- Working as a team we managed to install internet Access Points across different schools, markets and community social halls to enable the local community to gain digital literacy skills.

SKILLS

- Networking & Infrastructure: IP Address Management (IPAM), TCP/IP, DNS, VLANs, Peering Fundamentals, Core Network Support, Network Traffic Monitoring, Basic Network Troubleshooting.
- Security & Systems: User Access Control, Permissions Management, Log Monitoring, Basic Incident Detection, Network Security Fundamentals, Firewall Concepts, Secure Configuration Practices.
- Cloud & Virtualization: Cloud Fundamentals (AWS/Azure Basics), Virtual Machines, Virtualization Concepts, Exposure to Cloud-Based Infrastructure.
- Systems Administration & IT Support: Linux (Ubuntu, Kali), Windows, User Support, System Troubleshooting, Inventory Management, Preventive Maintenance, Platform Administration (IXP Manager).
- Professional & Client Engagement: Technical Communication, Client Coordination, Stakeholder Engagement, Support Follow-Up, Downtime Notification Management, Documentation and Reporting.
- Development & Tools: HTML, CSS, JavaScript, Firebase, Website Content Management.
- Sound knowledge in computer Maintenance, e.g., software installation and backing up of data
- Database management

- Proficiency in data analytics, e.g., SQL, Python.
 - Clear understanding of the use of Excel for Data Management, use of V-lookup, and Pivot point.
-

EDUCATION

Bachelor of Science in Computer Science | Pwani University | 2019 – 2023

CERTIFICATIONS & SHORT COURSES

Ethical Hacker | Cisco Networking Academy & USIU-Africa | 2025

(Instructor-led training covering ethical hacking concepts, vulnerabilities, and defensive security techniques)

Software Development | Power Learn Project | 2025

(Intensive multi-week training covering software development fundamentals, programming, and system implementation)

Cyber Security and Emerging Technologies Awareness Training | ICT Authority, Kenya & Cyber Shujaa | 2025

(Structured training on cybersecurity principles, digital threats, and emerging ICT technologies)

Security Analyst Course | Cyber Shujaa Program & USIU-Africa | 2024

(Multi-week hands-on training in threat analysis, incident response, and security operations)

Computer Application | The computer Society of Kenya | 2019

ACHIEVEMENTS

- Successfully implemented and maintained a centralized helpdesk system, improving IT support response time at Go Maxis Limited.
 - Reduced system downtime through proactive network monitoring and timely hardware/software troubleshooting at Go Maxis Limited.
 - Provided technical support to over 200 end-users, maintaining a high user satisfaction rate at the Badili Africa Limited.
 - Assisted in upgrading and securing company servers, enhancing data integrity and backup processes at Go Maxis Limited.
 - Played a key role in rolling out a company-wide ERP system and providing user training.
 - Automated routine IT tasks, reducing manual workloads and increasing department efficiency at Badili Africa Limited.
 - Supported the migration of critical company data to cloud storage, ensuring business continuity and data security at Go Maxis Limited.
